

Quelques explications pour comprendre ce "big" tableau !

Ce document fait ressortir les premières meilleures performances par discipline et par tranche d'âge des athlètes de l'EAC depuis sa création en 2008 (performances obligatoirement validées par la FFA).

L'Entente Athlétique Cessonnaise (EAC) a été créée à la rentrée de septembre 2008 avec le regroupement des clubs de l'AC Cesson et de l'ELAN Cesson.

L'année suivante, à la rentrée de septembre 2009, Janzé Athlétisme Pays de la Roche aux Fées a rejoint l'EAC,

Puis à la rentrée 2011, le club de l'ELAN Cesson s'est dissocié de l'EAC,

Actuellement, l'EAC est donc composée des licenciés des clubs de l'AC Cesson et de Janzé Athlétisme Pays de la Roche aux Fées.

Attention, par choix, les tranches d'âge de ce tableau ne font pas appel aux catégories actuelles,

En effet, sur ces dernières saisons, les catégories ont changé au 01 novembre (actuellement et depuis 2 ans) mais une autre année, elles ont changé le 01 décembre et une autre fois encore, le 01 janvier !

Pour la comparaison des performances, **le changement de catégorie a été homogénéisé au 01 janvier** en utilisant des tranches d'âge se rapprochant des catégories actuelles (12-13 ans, 14-15 ans, 16-17 ans, 18-19 ans, 20-22 ans, 23-34 ans mais aussi, ... 35-39 ans, 40-44 ans, 45-49 ans,).

Pour information, ces catégories sont celles utilisées **au niveau international** dans les catégories des jeunes.

C'est un peu moins vrai pour les « masters ». En effet, au niveau national et international mais uniquement en salle ou sur piste, la tranche d'âge d'un « Master » n'est effective que le lendemain de son anniversaire et non pas au 01 janvier !!! Bien compliquées toutes ces règles !

Exemples :

- Pour un athlète né en 2002 : Au cours de l'année 2016, l'athlète aura 14 ans ($2016-2002=14$). Ses performances établies en 2016 feront donc partie de la tranche 14-15 ans. En 2017, ses performances feront toujours partie de la tranche 14-15 ans puisqu'il aura 15 ans ($2017-2002=15$).
- Pour un athlète né en 1967 : Au cours de l'année 2016, l'athlète aura 49 ans ($2016-1967=49$). Ses performances établies en 2016 feront donc partie de la tranche 45-49 ans. En 2017, ses performances feront partie de la tranche 50-54 ans puisqu'il aura 50 ans ($2017-1967=50$).

Le nombre de performances par épreuve dépend de la popularité de la discipline. De façon empirique, au moins 10% des meilleures performances d'une épreuve apparaît dans le tableau.

- Pour 1,2 ou 3 performances dans une discipline et dans, au moins, une seule catégorie d'âge => uniquement la meilleure performance est mentionnée.
- De 4 à 20 perf dans une discipline et dans, au moins, une seule catégorie d'âge => Les 2 meilleures performances.
- De 21 à 30 perf => Les 3 meilleures performances.
- De 31 à 40 perf=> Les 4 meilleures performances.
- etc ...

Exemples :

- Au 07 décembre 2016, **158 performances** ont été établies par **la tranche d'âge 40-44 ans** sur **10 km à Label sur route masculin**. Le tableau fait donc apparaître les **16 meilleures performances pour le 10 km à Label sur route masculin**. Toutes les tranches d'âge profitent de ce quota pour cette discipline !
- Au 07 décembre 2016, **40 performances** ont été établies par **la tranche d'âge 14-15 ans** sur **50m masculin**. Le tableau fait donc apparaître les **4 meilleures performances pour le 50m masculin**. Toutes les tranches d'âge profitent de ce quota pour cette discipline !
